National Family Health Survey

363. SHRI MAHENDRA MOHAN: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether the National Family Health Survey-3 has submitted its finding and if so, what are its findings;

(b) what are the areas of concern that have been reflected in the survey; and

(c) what efforts are proposed by Government to address those areas of concerns?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRIMATI PANABAKA LAKSHMI): (a) and (b) The National Family Health Survey-3 has been conducted in 29 States. The field work was carried out in two phases that started in December 2005 and was completed in August 2006. The results of five States covered in phase-i viz Chhattisgarh, Gujarat, Maharashtra, Punjab and Orissa for few key indicators have been released.

2. Preliminary facts from the 2005-06 National Family Health survey for Chhattisgarh, Gujarat, Maharashtra, Orrissa, and Punjab reveal that some health and family welfare indicators have improved markedly in the past seven years since National Family Health Survey 2 conducted in 1998-99, while nutritional deficiencies remain a major challenger.
